EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Heng Loon Wong on 1/18/05.

The Examiner mistakenly wrote the Examiner's Amendment in response to the claims on 2/1/05. This Supplemental Allowance fixes this problem by having this Examiner's Amendment to refer to the claims on 8/20/04. This Examiner's Amendment amends the claims exactly as the Applicant Amendment submitted on 2/1/05, and is exactly what was agreed upon during the interview on 1/18/05. The Amendment is as follows:

In the claims:

- Replace claim 1 with below:

1. A method for managing a workflow process to bring execution time for said process at least closer to an expected deadline, said process including a plurality of work nodes and a set of priority levels associated with each work node, said method including the steps of:

generating for each work node a set of expected time to complete (ETC) values for each priority level, each ETC value denoting a cumulative time to complete the process including the

Art Unit: 2195

time taken by the corresponding node to complete its activity for a selected priority level, wherein said ETC values are generated using formula $ETC = \eta + 2\sigma$ and wherein η is a statistical mean and σ is a statistical standard deviation of values collected during a learning phase;

selecting for each work node a priority level that has a corresponding ETC value less than or equal to a remaining time available to meet said expected deadline; and

executing activities associated with said work nodes in accordance with said selected priority levels, thereby bringing execution time for said process at least closer to said expected deadline.

- Cancel Claim 4.

- Replace claim 6 with below:

6. A system for managing a workflow process to bring execution time for said process at least closer to an expected deadline, said process including a plurality of work nodes and a set of priority levels associated with each work node, said system including:

means for generating for each work node a set of expected time to complete (ETC) values for each priority level, each ETC value including a time taken by the corresponding node to complete its activity for a selected priority level, wherein said ETC values are generated using the formula $ETC = \eta + 2\sigma$ and wherein η is a statistical mean and σ is a statistical standard deviation of values collected during a learning phase;

Art Unit: 2195

means for selecting for each work node a priority level that has a corresponding ETC value less than or equal to a remaining time available to meet said expected deadline; and

means for executing activities associated with said work nodes in accordance with said selected priority levels, thereby bringing execution time for said process at least closer to said expected deadline.

- Cancel Claim 9.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Tang whose telephone number is (571) 272-3772. The examiner can normally be reached on 8:30AM - 6:00PM, Every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
